Burning Restrictions Lifted in North Tahoe Fire and Meeks Bay Fire Protection Districts

Tahoe City, Calif. Nov. 3, 2022 – The early November storm brought ample moisture to the region for the seasonal CAL FIRE burn suspensions to be lifted. CAL FIRE's lifting of restrictions indicates the end of our local fire season, and the Fire Chief has lifted seasonal fire restrictions for North Tahoe Fire and Meeks Bay Fire Protection Districts. Homeowners are permitted to use [properly screened wood-burning firepits and chimeneas, and charcoal barbecues](#) throughout the cold weather months unless high winds/red flag weather conditions prohibit safe use. (The outdoor burning of wood and charcoal is never permitted at Short-Term Rentals.)

Those possessing current and valid residential burn permits may resume residential burning on permissible burn days. CAL FIRE and the Air Resource Board, in conjunction with the Counties' Air Quality Management Districts, regulate "burn" and "no burn" days. Burn permits are required and residents must verify if a day is a permissible burn day through the [Placer County Air Quality Management District](#) for permit holders in the North Tahoe Fire Protection District, or the [El Dorado County Air Quality Management District](#) for permit holders in the Meeks Bay Fire Protection District.

RESIDENTIAL BURN GUIDELINES

- Renters must have written authorization from the property owner in their possession in order to obtain a permit.
- Maximum pile size shall be 4 feet in diameter.
- The area within 10 feet of the outer edge of the pile shall be maintained free and clear of all flammable material and vegetation.
- There must be a responsible adult in attendance with a shovel until the fire is dead out. There must be a water supply at the burning site.

No burning shall be undertaken unless weather conditions (particularly wind) are such that burning can be considered safe. Safe residential pile burning of green waste is an important tool in reducing fire hazards resulting from the buildup of forest residue. For more information on burning and to apply for a permit, visit the CAL FIRE website at <https://burnpermit.fire.ca.gov/>. For information on creating defensible space around your home, visit [Tahoe Living With Fire](#).
